

PSE

In PSE we are learning how to play with our friends by choosing games and playing them with a friend from class. And in cooking we are learning to be independent by collecting resources and doing things for ourselves.

Maths

This term, we are doing our maths lessons through PE. We are thinking about big/small objects we use in PE as well as making a sequence out of shapes.

Science

In science we are going to be making some dinosaur eggs and also trying to find ways to get into dinosaur eggs made out of different objects.

Class 8 - Spring 1
DINOSAURS

Things to do at home ...

Look for big small objects around the house/or when you are out.

Go on your own dinosaur hunt in the garden or park and make a collage of what you have found.

Literacy

Our story is "We're going on a dinosaur hunt!", in our story we have to get through lots of different places before we reach the cave to find the dinosaur! We are feeling different textures and finding the correct symbols to say what is happening.
