

Personal and social development:

This half term we will be working on our PSD targets through co-active movement, cooking, explorers club (Lunch time) and through a choosing station during our afternoon learning circle. We are learning to accept physical prompt, be comforted by known adults and to show anticipation in response to known activities and resources. As part of our weekly learning circle, we take part in pamper club on a Thursday and learn about developing self care and independence skills.

Communication and interaction:

This half term we will be working on our communication and literacy targets through morning greeting, afternoon welcome dance, our story, Interstellar Cinderella and rebound. Our topic story is an adapted version of Interstellar Cinderella and it is a call and response parachute song. This means we get to work on our targets like turning to a familiar adult or responding through vocalisations. The story also allows us to work on our intensive interaction skills, an area that we will be working on lots in the coming school year.

Class 10

Whole school topic: The stories people tell

Class topic: Interstellar Cinderella

Homework: Each week the adults will send home a sensory recipe from around the world. You could create the recipe and explore it with your family (Please send in photos). Or you could listen to / watch space stories and experience appropriate sensory resources.

Learning circle:

This half term our learning circle activities include exploring sensory recipes such as alien slime and moon sand and using our different sense to say if we like or don't like them. We will also be using the eye gaze to demonstrate understanding of cause and effect and exploring the sensory resources inside Aladdin's cave.

Cognition and learning:

This half term we will be working on our cognition and learning and maths targets through our space Tac Pac, we will be completing this activity in our sensory hut in the courtyard. We will also be working on our targets through a weekly Gamalan session, A 'Shabang!' music session and rebound. During our Gamalan session we will be flying around the world in our flying saucer and visiting different planets and listening to music that we might find there, we will also be exploring the vibrations of the instruments as well as playing them. Some of the planets include Mars and Earth and we get to visit the Moon!
